

BRACKLEY ELECTRIC

Providing electrical contracting services for marine and industrial applications in North America.

Marine, Industrial & Residential Electrical Specialist

Brackley Electric provides the very best in electrical contracting services. We are dedicated to safely and efficiently performing all marine and industrial electrical applications. From the simplest of jobs to the most complicated installations, Brackley Electric delivers the highest standards of craftsmanship.

Service Attitude: Even on large, new-construction projects, we recognize that, as electricians, we are very often in a service role to general contractors, architects, engineers, clients and other construction trades. We actively promote a team culture that accepts and embraces that role. We pride ourselves in building long-term relationships by satisfying clients and industry partners.

Flexibility: Change is inevitable over the course of a project. Often we face challenges that come in the form of late design alterations or structural interferences that do not allow for the installation of our electrical systems as planned. We expect that this will be the case and take pride in our ability to keep a clear head and navigate through these challenges in a positive and constructive way.

Safety & Quality: The sophisticated electrical systems that we install are inherently complicated and potentially dangerous. We take great pains to adhere to our comprehensive quality management and quality control systems to ensure that we follow best practices to avoid damage and injury. Our ultimate value is found in taking the proper time to do each task safely and correctly the first time.
